EVERY LAP COUNTS

ANNIVERSARY
In total the 30th
„Run Against
Cancer“!
(Chemnitz, Dresden
and Leipzig)

Under the sponsorship of the Prime Minister of the Free State of Saxony, Mr. Michael Kretschmer, the Sächsische Krebsgesellschaft e. V. invites you to „Laufend gegen Krebs“ in Chemnitz.

The 13th edition of the running event once again aims to raise funds to help people with cancer and their families.

As a **participant** in the running event, you complete as many laps as you want or can. For each round, instead of an entry fee, you (or a sponsor you have found) pay a voluntary donation. **No entry fee is charged.**

As a **company**, we invite you to support runners and running teams or to provide a **team** and thus support the projects of the Sächsische Krebsgesellschaft.

As a **school, child daycare center, or after-school care**, we are happy to welcome you along the route as an institution within the scope of the special start time for schools. Children, parents, and educators are also warmly welcome to join us individually within the framework of the „Everyone's Run“.

You can help us to help. Whether with your own team in the form of a team relay run or as a sponsor of an individual run - in any case you will benefit from numerous advertising opportunities and comprehensive communication of this event.

We would be pleased to welcome you as a new partner.

You can pay your voluntary donation on site, send it to the Saxon Cancer Society via PayPal or transfer it to the donation account. Thank you!

SUPPORTED PROJECTS

The proceeds from “Laufend gegen Krebs” will support the following projects:

Improving exercise opportunities for children, teens, and adults with cancer in the Chemnitz area

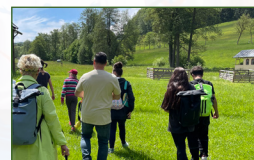

Exercise interventions carried out under expert guidance have been proven to reduce the side effects of cancer therapy and

increase the performance and self-confidence of those affected. However, since there are currently just a few specialized exercise programs in the Chemnitz area, the Association for Health Sports and Sports Therapy Chemnitz e. V. aims to establish long-term rehabilitative sports groups for oncology patients in childhood, adolescence, and adulthood. Those affected are also to be individually informed on the topic of sports and cancer. In addition to participating in sports together, the focus will also be on fostering social contacts and mutual exchange among participants.

Family weekend for young families affected by cancer

The „Sächsische Krebsgesellschaft e. V.“ would like to offer young families affected by cancer the opportunity to take a break from the burden of illness for a weekend, have fun together, strengthen mutual trust and also experience exchanges with other families.

Community housing project

The project's goal is to create a shared living space for those who are affected by cancer and their relatives in an age-appropriate living environment, to enable them to live independently for as long as possible in a community with other affected people and their relatives. This creates the opportunity for mutual help and support and is meant to help make dealing with cancer easier.
